

SDVOSB Antimicrobial

SDVOSB Thermal Camera Cart

Elevated Body Temperature, Non-Invasive Fever Detection

- Made in the USA with Cyber Secure Technology.
- Manufactured and Distributed by a Certified Diversity Supplier – Service Disabled, Veteran Owned, Small Business (SDVOSB).
- Quickly detect the temperature of multiple individuals via non-invasive imaging with our mobile thermal imaging cart for detecting Elevated Body Temperature (EBT). Audible and visual alarms for individuals with elevated body temperatures allows for expedited EBT safety testing.
- Includes:
 - **Thermal Imaging Camera** that can be forward or backward facing. Our exclusive camera technology is preconfigured for monitoring individuals and groups to find temperature deviations or elevated skin temperature (EST), including temperature alarms with a dynamically updated reference temperature. This temperature measurement solution offers built-in analysis, alarm functionality, and is a **FDA 510(K) Cleared Class 1 Medical Device**, see <https://www.accessdata.fda.gov/CDRH510K/K033967.pdf>
 - **Hot-swap Power Battery** Technology supports uninterrupted workflows with two batteries and a high-output charger. Use on batteries for remote operation, or plugged in.
 - **Advanced laptop computer** for management of the system and local storage of settings and data.
- Increase workplace and organizational safety, security and peace-of-mind with EST temperature testing using the SDVOSB Thermal Camera Cart. *HIPAA, EEOC & FERPA Compliant.*

Installed at NYS Psychiatric Institute on the Columbia University Medical Campus
